Introduction

WebFour is an idea initially born through humor and jest, in the true essence & spirit of crypto Twitter.

Jack Dorsey & Elon Musk, two world known tech entrepreneurs and Twitter personalities recently shed some personal insights and perhaps even light and on the structure of web3.0 and its distributions, after noticing some tongue in cheek humor in this back and forth, we took aim at creating web4.0, an idea that started as a fun meme coin for people to trade.

Initially our intentions were not heavily focused on webfour.io leading beyond the meme phase, but due to rapid community growth and an immediately apparent growing interest to see a project truly meant for the people in terms of access and distributions , we decided to create a concrete vision for WebFour, and a future. We believe that WebFour should be the peoples web, as WebFour is a symbolic representation of you.

As our team consists of experience developers, and we can easily resource additional developers and contractors as required, we will be building on top of WebFour with our native token being the fuel of the ecosystem.

Understanding the Meme Culture

Traditional Meme coins at their root tend to encapsulate social & cultural phenomena, moments of significance, pop culture, or just the general "lulz". But in the spirit of fun and inclusion they should always represent the people, their interests and always be fairly launched and distributed. Fair launch projects do not host IDOs, or private rounds and are completed in a manner where the deployer doesn't own any tokens, or initial stakes beyond that of the public investor. No pre-mine, pre-sale, or investment firm backing it. Just pure public interest

This is exactly the mindset we had when releasing WebFour. We had no intentions beyond bootstrapping initial liquidity on PancakeSwap, deploying our token on the Binance Smart Chain Network and releasing the idea in to the crypto-sphere for the people to either enjoy, or let fade in to obscurity. Thankfully it resulted in the former and it now actually appears that WebFour is fast becoming a cultural phenomenon and we are here to stay.

We did give hints that if we grew, we would put our skills to the test and build something representative of the people, and that is exactly what we are going to do.

We started off as a meme but have quickly and effortlessly transitioned into a very serious project and contender, with great interests and aspirations for our project, our community and the future.

Vision

Our vision starting out, is to give something back to the community initially through a P2E system paying out native token rewards, while we also create the system for WebFour to grow beyond a mere concept in to a reality, birthing a blockchain not owned in predominance by any one entity or corporate interest, and accessible for all to use, transact and develop upon.

Our tokenomics (as expanded upon below) contain a treasury system, which at this time we are using to fund the developments of the project concepts, as well as for current and intended marketing purposes. The treasury will also be used for server upgrades and any other expenses of business operations involved in running and creating WebFour.

We are extremely grateful with the available resources that we have built within our short existence, but having said this - WebFour relies heavily on the community, its continued involvement and its efforts if it is to become a project that morphs from an idea, to concept, to reality.

It's success relies on you the people, hence we've named it the peoples web. The more support shown, the more volume WebFour achieves. The more awareness that is created, the healthier the resources the treasury will obtain in order to fulfill its roadmap.

We have already begun to take the first steps forward by creating immediate utility and use-case for WebFour through the P2E points covered in brief above, with the end goal of releasing our own Blockchain. This will continue to hold the meme ethos in its spirit, and will be named the "Degenerate Blockchain". More information about the use case of our blockchain will be released in our V2 Litepaper, and this will further outline details and utility on how the Degenerate Blockchain could benefit users and developers that choose to utilize this technology.

Tokenomics

2% NATIVE BNB REWARDS

We accumulate a pool of native tokens (BNB) that you can currently claim every 24 hours after buying/selling/transferring \$WEBFOUR. Your rewards do not accumulate, so be sure to claim and engage every 24 hours.

5% TREASURY (stored in BNB)

Since this is a fair launch. This is one of the most vital sources of revenue to be funded for marketing and exposure of our new tech web 4.0. It will help grow to the places we want to get to as a community and ecosystem and build web 4.0

3% REFLECTIONS / REDISTRIBUTION

Every buy/sell order rewards loyal \$WEBFOUR holders with passive and compounding rewards dropped in your wallet automatically in \$WEBFOUR

1% DYNAMIC BUYBACK & BURN

Default buyback and burn \$WEBFOUR

WHALE BOT PROTECTION

Max Sell Per TX: 5 BNB

Roadmap

Q1

- Listing on CoinGecko
- Listing on CoinMarketCap
- Listing on DexTools with 90+ Score
- Having 10k+ members on all socials
- Marketing
- 10,000 Wallet Holders
- Announcing Developments
- Bringing in Play to Earn Method as a game on WebFour.io

Q2

- 20,000 Wallet Holders
- Reinvent UI
- Real World Marketing
- Building our Blockchain named “Degenerate Blockchain”
- Adding use cases to our native blockchain
- Implementing utility to \$WEBFOUR token

Q3

- 50,000 Wallet Holders
- Adoption of our blockchain
- Crypto Targeted Marketing for adoption of our blockchain
- Building another P2E Game on our website

Q4

- 100,000 Wallet Holders
- Building a Web4 DApp
- Building a Web4 Wallet
- Bringing on developers to build onto WebFour and release DApps
- Supporting developers and building a grant system for utilizing WebFour Blockchain.
